

Chase Growth Fund

Investment Objective & Strategy

The fund seeks to achieve growth of capital while maintaining a prudent risk profile. The purpose of the fund is to provide a sound investment in an investor's long-term financial plan.

Strategy

The fund's adviser, Chase Investment Counsel Corporation, seeks high quality large-cap growth companies that are prudently priced. Starting with a broad universe of stocks, a fundamental screen is used initially to focus on those names with a history of delivering consistent growth such as earnings growth of 10% or more for the past five years and increasing earnings in seven of the past 10 years. A further analysis refines and ranks the universe to a smaller number of stocks using additional fundamental and technical factors such as positive earnings revision/surprises, strong relative price performance, and improving profitability. The portfolio holds 30-45 stocks diversified by both sector and industry group.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the fund may be lower or higher than the performance quoted. The most recent month-end performance may be obtained by visiting our website at www.chaseinv.com. The funds impose a 2.00% redemption fee on shares held 60 days or less. Performance data does not reflect the redemption fee. If reflected, total returns would be reduced.
