Chase Mid-Cap Growth Fund to be Featured at New York Media Briefing

CHARLOTTESVILLE, VA (March 7, 2013--Brian J. Lazorishak, senior portfolio manager, Chase Mid-Cap Growth Fund (CHAMX), will speak at the annual SunStar Strategic Media Briefing on March 19, 2013. The event, to be held at the Hilton New York, is for journalists only and showcases undiscovered funds.

Lazorishak will discuss "Combining Technical and Fundamental Analysis to Find Growth in Slow Growth Environment," followed by a question and answer session. He will also share the firm's outlook for 2013. The fund seeks capital appreciation while maintaining a prudent risk profile. The purpose of the fund is to provide a sound investment in an investor's long-term financial plan.

The fund's adviser, Chase Investment Counsel Corporation, seeks high quality mid-cap growth companies that are prudently priced. Starting with a broad universe of stocks, a fundamental screen is used initially to focus on those names with a history of delivering consistent growth, such as earnings growth of 10 percent or more for the past five years and increasing earnings in seven of the past 10 years. A further analysis refines and ranks the universe to a smaller number of stocks using additional fundamental and technical factors, such as positive earnings revision/surprises, strong relative price performance, and improving profitability. The portfolio holds 35-55 stocks diversified by both sector and industry group. More information can be found at www.chaseinv.com.

The fund's objectives, risks, charges and expenses must be considered carefully before investing. The Statutory and Summary prospectuses contain this and other important information about the investment company, and it may be obtained by calling (888) 861-7556 or visiting www.chasegrowthfunds.com. Read it carefully before investing.

Mutual fund investing involves risk. Principal loss is possible.

The Fund invests in mid-cap companies, which involve additional risks such as limited liquidity and greater volatility. The Fund may invest in foreign securities traded on U.S. exchanges, which involve greater volatility and political, economic, and currency risks and differences in accounting methods. Diversification does not assure a profit or protect against a loss in a declining market.
